

**Saturday, January 20, 2024**

**2 – 4 p.m.**

**Technology**

**2.0 MCLE Credit Hours,**

**Supreme Court Commission on CLE Course #: 240035**

**Room Location: Willow**

## **Technology and Law**

ChatGPT is on the process of becoming integrated with the practice of law. Meanwhile, artificial intelligence, generally, has been a fixture in the practice for some time. And what about crypto? Can lawyers accept that for their fee? Stuart Teicher, Esq., the CLE Performer will explain the basics of these technologies and teach the ethical implications for lawyers.

The second part of the seminar will focus on Cryptocurrency Litigation. While the early days of cryptocurrency were shrouded in intrigue and uncertainty, recent years have seen a trillion-dollar economy develop around digital assets. Where one finds money, one finds litigation. An attorney is ill-equipped to handle such litigation, however, if she does not understand the technology underlying the cryptocurrency economy. Attorney Graham Newman will provide a fundamental overview of cryptocurrency technology, the types of litigation emerging in this field, and how the crypto technology itself is used to prove a case.

### **Agenda**

2 – 3 p.m.
